

DELPHI

Date: 02. April 2008

Attention R. Dietrich – Quality Manager , PSG

Subject: EU Registration, Evaluation, Authorization, and Restriction of Chemicals

Dear Mr Dietrich,

This letter is to respond to your request for specific information concerning products Delphi supplies to you. Products are defined as substances, preparations, or articles according to the European Union regulation EC 1907/2006.

Delphi Corporation and its affiliates ("Delphi") are committed to taking the necessary steps to ensure compliance with our REACH obligations. Delphi has implemented a continuous process for gathering information concerning our wide array of products as necessary to assist our suppliers and customers in complying with their registration and notification obligations under the EU REACH Regulation.

Just as you rely upon Delphi to provide information on the materials, parts, and subcomponents we supply you, Delphi relies upon its suppliers in gathering this information. The accuracy and completeness of our information depends upon the reporting of our suppliers, and the many cascading tiers of part and material manufacturers that ultimately feed the vehicle industry at large. Delphi is obligating its suppliers to provide complete and accurate data, and Delphi has gathered and treated the information with due care and reasonable diligence.

Delphi understands its REACH obligations and has formed a global team to implement our internal business process to ensure applicable REACH compliance for substances, preparations, and articles used or manufactured in the EU and for those imported into the EU by Delphi or its legal representatives. In general, Delphi is a supplier of articles, and not a supplier of substances and preparations.

To the best of our knowledge, and per the Automotive Industry Guideline, www.acea.be/reach, substances and preparations used in the articles supplied to our customers do not intentionally release and are integral to the functioning of the part, and therefore are not subject to REACH registration. At this time, Delphi has no intention of registering substances in articles. In addition, Delphi will rely on the substances of concern data reporting process via the International Materials Data System and the Global Automotive Declarable Substances List to identify and notify you of the substances of very high concern (SVHC) contained in the articles supplied to you.

Delphi's primary global REACH contact is:
Paul Haerens
Environmental, Health & Safety Manager EMEA
Delphi Deutschland GMBH
Customer Technology Center Wuppertal
Delphiplatz 1
42119 Wuppertal
Germany
