Delphi Enhances GT & Metri-Pack Connector Lines

We are excited to announce that Delphi's new enhancements to their GT and Metri-Pack connection systems has enabled them to pass SAE's J2030 Heavy-Duty Electrical Connector Standard. Their new offering of terminals with silver interface plating allows the systems to meet this stringent specification. Here are some of the benefits that can be expected as a result of this enhancement:

- Improved performance in high vibration applications
- Higher conductivity performance ratings
- Reduction of fretting corrosion
- Lower engage force improve reliability and ergonomics

Check out the links below to view the product datasheets for these lines. Also, below is a list of terminals for this product that need to be used in order to pass the J2030 requirements.

Contact your sales representative today to find out more about this exciting product and to receive a quotation!

Thanks,

Power & Signal Group
